

Atty. Docket : H60-099 US
Serial No. : 09/975,885

ABSTRACT OF THE DISCLOSURE

A method, installation and reactor is for the production of components or of their intermediate products. Each component in the process of being produced as a structural member, is subjected to a treatment process and several of the structural members are simultaneously subjected to a common CVD process under conditions of ultrahigh vacuum. The treatment process is a vacuum process and from it the structural members are supplied to the CVD process under vacuum.
